Turn your desktop into a text terminal!

Welcome to VTM 1.0 (Virtual Text Messenger)

This easy to use SMPP SMS client has the following features is extremely user friendly has a simple interface and fast It allows you to send SMS through the SMSC. We use the SMPP protocol allowing us to support text binary and two way messaging

- Compose one to one or group SMS offline and send when connected or compose it while online and send it instantly
- Phonebook to save and recall names and mobile numbers

## Starting off

You need to first enter the account information that is registered on our SMSC If you have not already registered you can [register free](http://www.abtxt.com) (www.abtxt.com)and receive free message credits to try this software

Options>>>settings allows you to enter your account sender information and server information

- Username : This is the Case sensitive username registered at our server
- Password : This is the Case sensitive password registered at our server
- Sender ID : This is the sender information on the SMS This is a mobile number that you want to receive replies on or a alpha numeric value your name company name website name etc
- Port : Leave it at default 2775

## This software has two main sections

SMS	contains your Inbox, outbox, Sent items deleted items,
Inbox	is not presently in use but is a future option
Outbox	Contains SMS that are queued up for delivery to our SMSC
Sent items	Contains list of SMS sent
Deleted items	Contains list of SMS that are deleted from any one of the above

Phonebook	contains phonebook and deleted items
Phonebook	Displays your phonebook list
Deleted items	Displays deleted phonebook entries

Double clicking on a phonebook record opens a compose SMS dialogue box for that record  
Select and entry and right click or Edit option to edit copy or delete entry

## The quick call Icons on the top

Compose SMS Click on this to compose an SMS a Compose dialogue box will open up allowing you Enter a Target mobile number or clicking on the double >> button will open your phonebook Simply highlight single or multiple entries and click on "ADD NUMBERS" button to add your selection to the list of numbers you wish to send a message to after you are done composing simply click on the send button and if you are online the messages will be sent right away If you are offline the messages will be stored in your outbox pending delivery to our SMSC

Add Phonebook entry Clicking on this icon will open up a add record dialogue box To add an entry simply type the name and mobile number in International format +CCCCMMMMMM

Where CCCC is the country code and MMMMM is the mobile device number

Send and Receive Clicking on this icon when on the Internet send the contents of the outbox to the SMSC
